

Chemical Materials Agency

Greg Mahall

Comply

CMA ensures compliance with all applicable U.S. and environmental laws in the operation and closure of chemical demilitarization facilities, and in operations worldwide.

Eliminate

Chemical demilitarization facilities safely destroyed 90 percent of the U.S. chemical weapons stockpile. CMA continues to use transportable systems to ensure safe destruction of recovered chemical warfare materiel.

Protect

CMA is charged with safely protecting its workforce, the public and the environment. This is accomplished through continuous monitoring and key partnerships with local and federal agencies.

Store

CMA is responsible for the safe storage of our Nation's chemical weapon materials pending its ultimate destruction.

Transform

CMA continues safe storage and destruction of chemical warfare materiel while preserving chemical weapons expertise.
